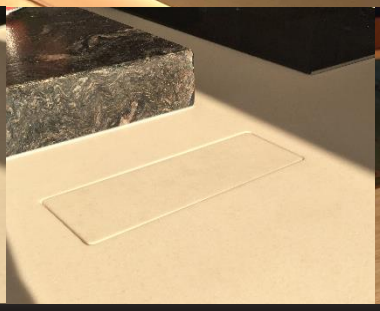
S-BOX™
CHAMELEON

INTERNATIONAL POP-UP SOCKETS



WITH CAMOUFLAGE SKILLS

S-Box® Chameleon pop-up sockets are very special.

Their patented 'instant lift' action not only delivers power points quickly, by the simple press of a finger (with no motor, no springs, and no gas struts to do so) they are also cleverly designed to use the project material as their custom top.

It is at last now possible to provide countertop power that is camouflaged in its surroundings . . . until it is actually required!

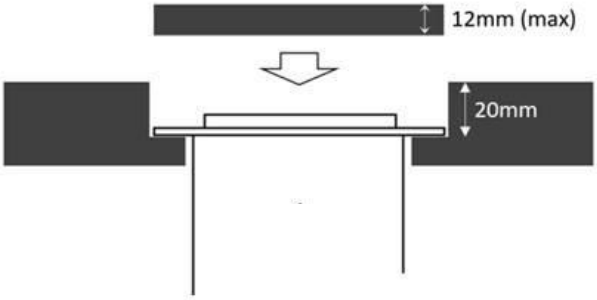
S-Box™ products are nothing like the plastic towers of the past. They are tough, stylish and discreet, and are built from solid steel.

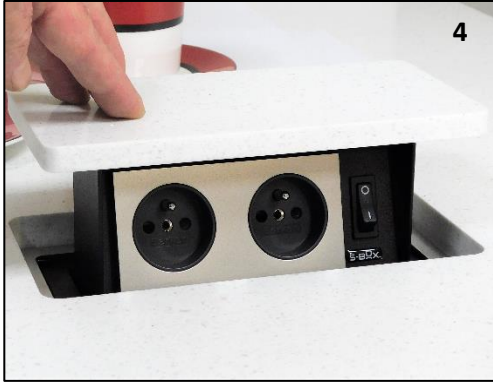
IN NATURE CAMOUFLAGE IS A MATTER OF SURVIVAL . . IN DESIGN IT'S A MATTER OF STYLE!

S-Box® Chameleon pop-up sockets are available in a range of International plug types and are used by Designers in over 60 Countries around the world.

The S-Box™ socket box design has passed the very latest **Countertop Spill and Splash Tests for use in Wet Areas** so they are both a stylish and safe solution for providing convenient power in any work-surface or kitchen island.

NEC 2.2 litre (½ Gallon) Saline Liquid Spill Test 406.5 (E)





. . NO MOTOR
. . NO SPRINGS
. . NO GAS STRUTS

A "zero-energy" lift system that *adjusts* for different weight!

S-Box® Chameleon uses a 12mm (max) piece of your work-top material to create a blended and camouflaged installation.

TO SEE S-BOX™ IN ACTION CLICK > YouTube

The patented lift-action still pops-up smoothly whatever density of material is being used!

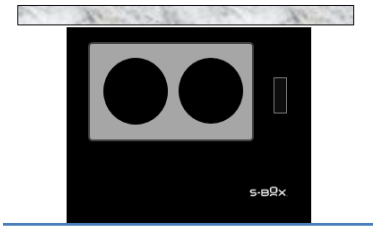
This is the engineering break-through that designers have been waiting for. A simple adaptable 'lift-system' for ***any*** material . . . from lightweight timber through to heavy-weight granite and quartz!

It is now possible to provide convenient countertop power without spoiling the clean lines of any design, or the beauty of a surface finish.

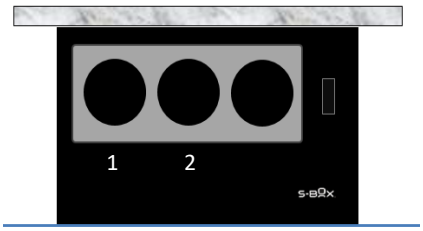
All units now USB A+C 25W.

CAMOUFLAGE IS DEFINITELY A MATTER OF STYLE!

S-Box® socket box units are available in two sizes, offering either 2 or 3 'ports'. They are manufactured as complete sealed units with a 2.4m cable tail for connection to mains power by qualified electrician. This cable can also receive a plug if preferred.



2-PORT (MINI)



3-PORT

Units are available in range of international sockets

TYPE G
BRITISH STANDARD

TYPE F
EURO

TYPE E
FR/BE
PL/CZ

TYPE L
IT

TYPE J
CH

TYPE B
US
120v only

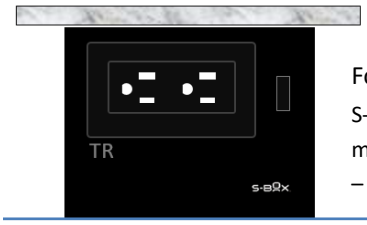
TYPE I
AU/NZ
(3-port only)

In ports 1 & 2 of the 3-PORT model only these modules can be fitted instead of sockets

USB A+C 25W

RJ45
(Including connection tail)

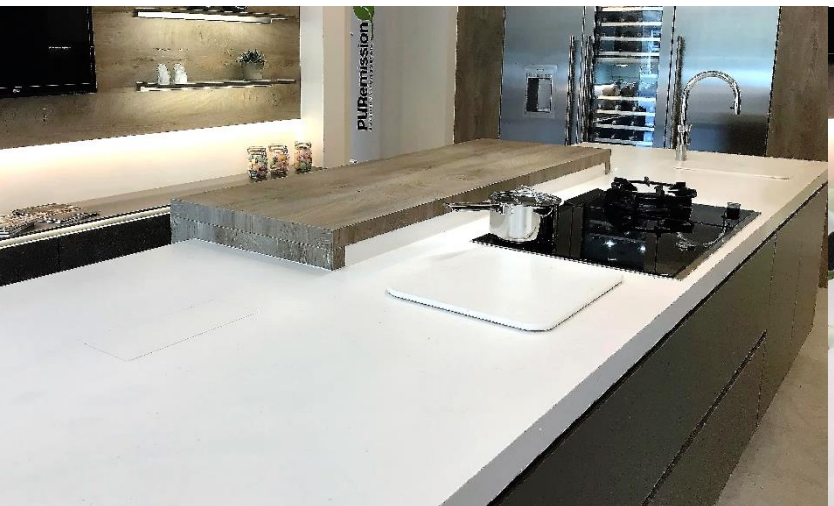
HDMI



For <u>domestic use</u> in USA & Canada S-Box™ units are <u>only</u> supplied as **MINI TR** models **with Tamper-Resistant receptacles** – as required by NEC regulations.

These are available in 15A or 20A models

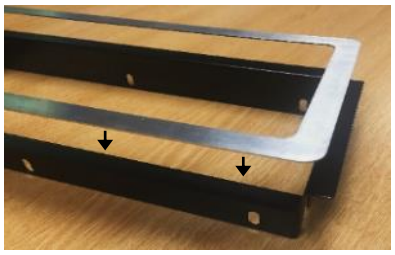
C22.2
LISTED



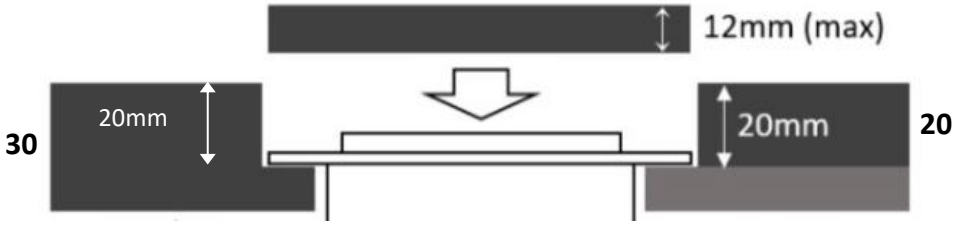
S-Box® Chameleon is suitable for *all* interior design

S-BOX™ CHAMELEON MODELS are supplied with a special 'any-radius' black collar. This is pre-set and fixed for installation of the unit **at -20mm below the surface on a rebate shelf** – one that is pre-cut within (or 'created' below) the counter material.
The unit is therefore ready to receive a piece of worktop material **up to 12mm thick maximum** – to be used as the unit's top.

A Stainless Steel trim for insertion into the rebate is also provided.



PLEASE CONSULT WITH YOUR WORKTOP SUPPLIER TO CREATE THE 20mm REBATE and THE CUSTOM TOP



All S-Box™ Chameleon units drop into position from above. No fixings required.
They are SOLID STEEL ENGINEERING.

SEE CUTTING and INSTALLATION INSTRUCTIONS FOR ALL WORKTOP MATERIALS (30/20/12mm)

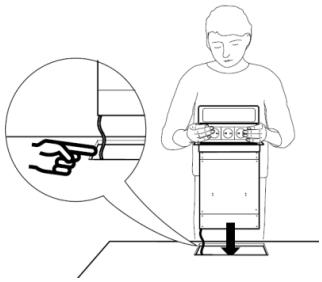
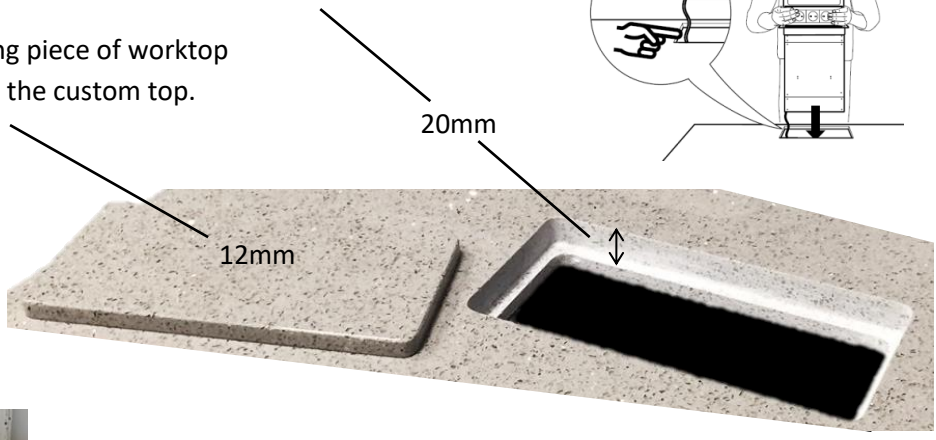
THESE UNITS ALSO INCLUDE EXTENSION TAIL AND ‘FEMALE” CONNECTOR.

No signal. Check the external input
or select another input using the
INPUT button.

TECHNICAL INFORMATION

S-BOX® CHAMELEON MODELS are supplied **without a top**, and are designed to drop into a pre-cut hole in the Counter **<u>on a rebate at exactly 20mm below the surface</u>** *i.e. a 'shelf' of material*.
They are duly ready to receive their own matching piece of worktop (**up to 12mm maximum thickness)** to be used as the custom top.

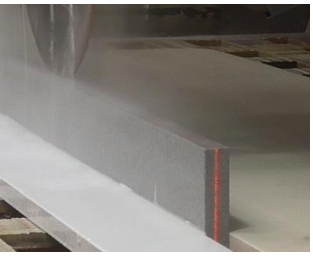




CUTTING OF STONE MATERIALS SUCH AS GRANITE & QUARTZ IS A **FACTORY PROCESS** SO PLEASE INVOLVE THE FABRICATOR OF SUCH MATERIALS IN THE DESIGN & SPECIFICATION PROCESS

Router-tool follows instruction

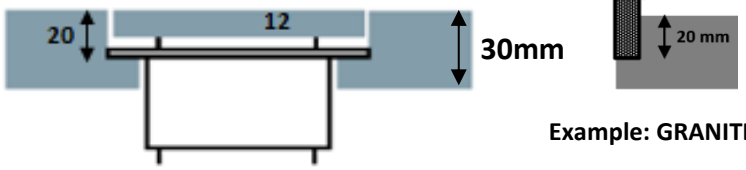
Router-tool above material



Slicing off-cut for custom top

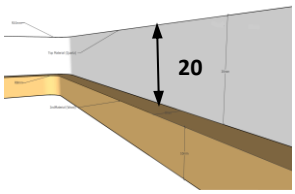
Router-tool cutting the hole

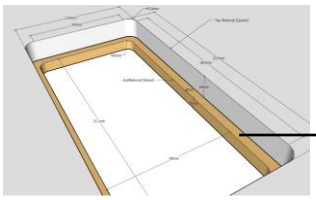
This rebate is either a "**<u>True</u>**" - one that is pre-cut by a router **<u>within</u> thick material** (**30mm and over**)

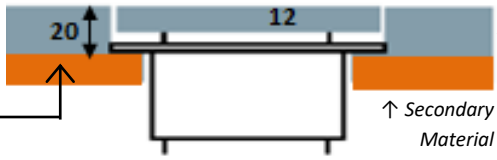


Example: GRANITE

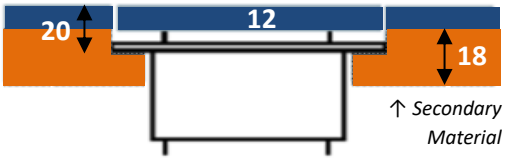
OR it is a "**<u>False</u>**" rebate. This is one that is *created* directly below thinner material (**20mm or less**) by using a **secondary material bonded underneath** to 'create' the shelf.







Example: QUARTZ



Example: CORIAN
